Redesigned T3 Driver works on all existing mount platforms.

Increased weld size from 3/8" to 1/2" and an added gusset for a more robust housing.

**Old Style
Strike Plate**

**New Style
Strike Plate**

Enhanced strike plate is completely round making it stronger, eliminating binding or cutting for better durability.

**Visit danuser.com for more
Danuser attachments.**

New hydraulic manifold means the driver operates on vehicles with flow from 0-30 GPM, similar to the Hammer Post Driver! Simple plug and play operation without the hassle of velocity fuses or check valves.

Hoses and couplers can be interchanged without affecting the performance of the T3 Driver.

Improved lower housing design features seven 1/2" bolts, as opposed to five 3/8" bolts on previous design, with more threads per inch for increased strength and better engagement.

danuser.com

Established in 1910, DANUSER has been family owned and operated by four generations. We have manufactured auger systems since the mid-1940's. With over 70 years of design and manufacturing experience, our machines have dug millions of holes. Today our commitment to our customer remains to design and build products that are the benchmark of quality, reliability, and longevity. In the words of our founder K.B. Danuser, "Good enough won't do - it must be right."

DANUSER manufactures several attachments for various equipment, serving several industries worldwide. Please visit www.danuser.com to see our full line of attachments.

Danuser reserves the right to make changes in design, specifications, and prices without notice and without incurring any obligation relating to such changes.
